

## Required performance

Generates aerosol at the most appropriate size and maximizes the amount of deposition for maximum treatment effect.

## Valve function

As a result of the unique structure of aerosol exit and exhalation vent, the mouth-piece has a virtual function of exhalation valve without the need for a silicon valve.

As a result of the unique structure of air intake slit, the cap and inhalation top have a virtual function of inhalation valve without the need for a silicon valve.

Thanks to the powerful compressor and unique V.V.T. (Virtual Valve Technology) Nebuliser kit, more medication is atomized into fine particles, reaching lower respiratory tracts more effectively and resulting in better medication compliance, therefore more medication enters the lungs. The special V.V.T Nebuliser kit makes it easier to breath while effectively inhaling medication.

## User friendly

### Air tube connector (all parts)

Easy to connect and remove with large air tube connector even for elderly people.

### Instruction manual

User friendly with clear cartoon instructions.

### Nebuliser kit holder

Convenient holder for Nebuliser kit when not in use or pausing treatment.

## Safety

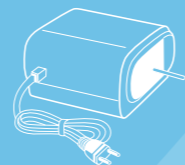

### Water resistance switch cover

(CompAIR and CompAIR Pro)  
The power cord is directly fixed to the compressor and cannot be detached.

### Power cord

(CompAIR and CompAIR Pro)  
Power cord is an integral part of the device. No separate cord to lose.
